Prepare for an exciting career in Analytics.

In just three semesters over 16 months, an MS degree in Analytics will position you for success in the rapidly growing analytics job market. Our MS degree emphasizes data-driven decision making in industry settings.

The Minneapolis St. Paul (Twin Cities) area is a high-tech urban environment with nearly four million people and thousands of companies in healthcare, finance, transportation, manufacturing, and other analytics-intensive industries. Minnesota is home to 19 Fortune 500 companies.

Interdisciplinary Coursework Includes:
- Intensive statistics, computer science, and optimization courses.
- Seminars from industry analytics experts.
- An industry-sponsored capstone project supervised by faculty and industry advisors.

FOR FALL ADMISSION, APPLY BY
FEBRUARY 15TH

Applications received after February 15th will be evaluated on a space-available basis.
